The filter ring is threaded to accept 2in. dia. filters (48mm), the filters can be installed from either side the the ring. The ring holds four filters, with the fifth position as a blank to allow the focuser barrel to pass through.

- Installation of filter ring requires drilling three holes in the focus board, see layout below for hole locations.
- The filter ring is mounted to the focus board at the distance selected with the spacer kit.
- The ring is milled out of aluminum plate and has a black anodized finish.
- There are three different versions of the filter ring, this version is mounted above the focuser, appropriate for large solid tube scopes and tall secondary cages like the Starmaster telescopes. Alternate versions FR5-1 & FR5-3 accomodate different scope designs.
- Mounting hardware is included in the kit.
- Total weight of assembly is 152 grams, 5.4oz
- $110.00 plus shipping

Filter wheel kit includes:
1ea. Filter ring
3ea. Detent block
3ea. Center post
1ea. Spacer and hardware kit
